Summary of Key Findings

The Status Quo of CSOs in Jordan

Democratic selection of administrative members (78.9%), equal employment opportunity (78.5%) and cooperation and partnership between civil society organizations (CSOs) (71.7%) were found to be largely prevalent among CSOs working on political participation and democratization in Jordan. Social media granted CSOs (89.5%) a platform to publicly discuss some issues and topics, that were otherwise sensitive and unattainable.

Today, the overwhelming majority (98.7%) would accept a female figure to be the president or director of their organization. In fact, the majority (88.6%) know of a female-headed CSO in their areas. Many CSOs have projects that are targeted at women (93.7%), youth (87.7%) and persons with disabilities (59.5%).

On the other hand, the most prevalent issues that face CSOs are finding means of financing and acquiring funding for project implementation (89.9%), the lack of competent staff (84.0%), followed by some CSO members overriding the institution (77.2%), grouping (73.4%), nepotism (72.6%), and donors overriding those institutions (68.4%). The majority (92.4%) think that funding is not distributed evenly among CSOs, and that this is reflected negatively on their work (74.9%). In addition, over two thirds (69.2%) think that CSOs were indeed established to serve their founders' private/personal interests.

41.2% are not content with their current supervisory bodies, and the majority (70.5%) would prefer to be registered at either one of the Ministries of Social Development, Political & Parliamentary Affairs or Culture. As for the impact of COVID-19 pandemic, the majority (84.0%) reported a negative effect on the work of their organization.

الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Knowledge, Perception and Engagement with CSOs

The overwhelming majority (97.5%) of Jordanians have a basic knowledge of what CSOs are, and 65.3% know at least one CSO in their areas. Prevalence of CSOs is slightly higher in rural areas. Even though half the Jordanians (49.9%) believe in the importance of CSOs, only 30.2% know how to join one of these organizations and less than a quarter (23.0%) are members of CSOs.

Nevertheless, 70.6% have either communicated, worked, or participated in an activity conducted by a CSO in their area, and 88.2% outside their area. Most of these engagements were either workshop, training and awareness sessions attendance (29.7%), charity, volunteering and/or aid receipt (23.8%), and participation in religious and Quran memorization programs (12.9%).

Many Jordanians do not know of any CSO programs that support women (48.5%), persons with disabilities (53.1%) or youth (68.1%) in their areas, as well as are not aware of CSOs that are headed by females (52.8%); even though 32.4% think that female headed organizations perform better than those by men, while only 20.0% think the opposite is true.

64.3% think that CSOs are carrying out their tasks adequately, (65.0%) trust CSOs in general, (66.5%) trust CSOs in their areas, and (66.5%) think CSOs work for the public good. At the same time, a considerable 29.9%-31.0% voiced their doubts in the proficiency and good intention of CSOs (respectively), which was reflected in their lack of trust in CSOs (30.5%). Females reported a slightly higher degree of trust in CSOs. The reasons for not trusting CSOs in general mainly stemmed from the perception that CSOs are exploited to serve personal interests (42.3%), the lack of transparency, credibility, and justice (33.2%), financial and administrative corruption (7.9%), and racism/prejudice (4.7%).

Most Jordanians think that the main work of CSOs should be related to charity (51.0%), youth empowerment (44.4%), supporting economic opportunities and small businesses (37.9%), women empowerment (32.1%) and societal issues (25.2%). Only a few (12.8%) think that the main role for CSOs should be political development.

الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Role of CSOs in Influencing Political Participation and Promotion of Democracy

The majority of CSOs (91.1%) think that they have become considerably integral to the Jordanian social component primarily due to higher people awareness nowadays. The majority (86.5%) also believe that they exert a moderate to high influence on the political participation course and promotion of democracy in Jordan, mostly by raising awareness (81.4%) and conducting trainings (38.4%), and that they have become influential actors in the decision-making process (73.8%). Only a few build coalitions with other CSOs (7.2%), monitor elections (3.0%) or hold advocacy campaigns (2.5%).

CSOs think that they play a sufficient role in supporting refugees (64.6%), human rights (58.2%), the local community (57.0%) and promoting democracy (52.3%), but to a lesser extent in promoting political participation (37.1%), mostly due to the decision-making bodies neglecting the role of CSOs in this regard (42.3%), running weak programs (28.2%), inadequate funding (14.8%) and misunderstanding of the supposed role of CSOs by members of the community (10.7%).

77.3% of CSOs see that they will have a considerable role in the upcoming municipal and decentralization elections in Jordan, and 67.1% think that CSOs have the ability to form a civil alliance to activate popular monitoring of the parliament.

As for the local community, 55.7% of Jordanians do not think CSOs contribute to enhancing political participation in Jordan, and 41.7% do not think the role of CSOs in influencing political participation and promotion of democracy has changed over the past five years at all. Furthermore, 69.4% see that CSOs should not have a greater role in influencing political participation and promotion of democracy.

مركز الدراسات
الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Elections Participation and Parliament Monitoring

19.0% of CSO staff respondents did not participate in the 2020 parliamentary elections, mostly due to dissatisfaction with the electoral process and/or candidates, or health issues (including infection with COVID-19). The majority (76.8%) also did not campaign for any candidate the same year of elections. Only 22.4% constantly/frequently follow the current House of Representative's members' activities, whereas 31.6% follow their electoral district's parliament representative's activities as frequently.

More than half (57.4%) of CSOs surveyed maintain communications between their organization and their electoral district's parliament representatives. These include meetings and roundtables (30.1%), direct/indirect communication through social media (15.4%), receiving financial and moral support (14.0%), collaboration (11.8%) and attending CSOs' activities/events (10.3%).

As for the local community, almost half (48.2%) of Jordanians reported to not have participated in the 2020 parliamentary elections, mostly due to lack of trust in the electoral process, the candidates and the House of Representatives altogether. Of those who had cast a vote, the majority (56.8%) based their electoral decision on tribal and regional connections. A considerable 38.2% voted based on the candidate's electoral program. Only 1.4% made a decision based on their political party affiliation, and 3.7% had other reasons on which they relied to vote.

65.3% of Jordanians reported that CSOs in their areas did not campaign for candidates in the 2020 parliamentary election and only 13.3% reported that they had a role in encouraging citizens to participate. According to them, the CSOs' role was mainly to provide guidance and awareness (41.5%), support certain candidates (33.5%), and hold roundtables (8.5%). A few respondents reported that some CSOs elect candidates in return for a favor (4.8%), or to receive financial aid (3.7%).

الاستراتيجية
CENTER FOR STRATEGIC STUDIES

The Role of Trainings on Political Participation and Democratization

The majority of CSOs (94.6%) think that providing trainings on political participation and promotion of democracy are important to their organization's work, and a definitive 89.0% think that the number of trainings on political participation and promotion of democracy conducted must be increased.

Over the next five years, the majority (96.2%) also think that such training workshops will play a moderate-high role in spreading community awareness and understanding the process of democratization, as well as (93.2%) a moderate-high impact on political participation and promotion of democratic change.

Qararuna-CSS Training Impact

A slightly higher percentage of participants who had received Qararuna-CSS training (difference of 4.6%) think that CSOs in Jordan have a moderate-high role in influencing political participation and promotion of democracy.

Regarding activities that CSOs reported to conduct to influence political participation and promotion of democracy, 11 out of the 17 CSOs that work on coalition-building, 4 out of 6 who do advocacy campaigns, and 6 out of 7 who monitor elections were Qararuna-CSS trainees.

A significantly higher percentage of CSO staff respondents who have received Qararuna-CSS training knew of CSOs that monitor the parliament (difference of 14.1%) and think that CSOs in Jordan have the ability to form a civil alliance to activate popular monitoring of parliament (difference of 13.7%).

Preface

Throughout the past decade, Jordan has been able to successfully manoeuvre serious predicaments with the ultimate aim of achieving comprehensive development, regardless of the local and neighbouring political, economic and humanitarian challenges. Entering into the kingdom's second century, the vision of His Majesty King Abdullah II concentrates on political reform, **peaceful democratic transition** and **inclusion** of all social segments, particularly the youth, in **decision-making** and **public life**.

In His Majesty's own words, "to promote political participation and increase the participation of political parties and youth in Parliament, we must **revisit** laws regulating political life, such as the election, political parties, and local administration laws, and continue political development efforts".

The emphasis in the coming phase must be to build a **culture of coalition** and **collective action**, focus on **consolidation** and social cohesion, and further strengthen the role of civil society and local communities in contributing to the peaceful democratic transition and solidifying through widening political participation, improving good governance, enlarging decision making processes and enhancing both accountability and civic duties.

However, this process is one that requires constructive engagement, purposeful training, and periodic, systematic exploration of the continuously changing attitudes and perceptions of the people in order to sustain the reform and democratic process in Jordan.

The continuous support of actors such as the Spanish Agency for International Development Cooperation (AECID), the European Union (EU) and the Center for Strategic Studies (CSS) at the University of Jordan, to build a culture of coalition and collective action particularly among CSOs, political empowerment of women and youth is crucial to **ensure a meaningful transition**.

الاستراتيجية
CENTER FOR STRATEGIC STUDIES

There is no one model of democratization that fits all societies. However, over the past 6 years, the solid partnership between AECID and CSS (through the project of Qararuna and TAHDIR), proved to be a successful model for paving the way for **openness** and **democratic discourse** in the country and the region.

CENTER FOR STRATEGIC STUDIES

Project Brief

‘Strengthening Civil Society Organizations in Jordan towards Better Influencing on the Democratization Process’ is a subgrant project within the framework of the fourth component of the EU-JDID” Support to Jordanian democratic institutions and development program”, Qararuna: Support to Civil Society for Democratic Governance, which is co-funded by the Spanish Agency for International Development Cooperation (AECID) and the European Union. The project was launched in September 2018, and implemented by the Center for Strategic Studies (CSS) at the University of Jordan, until September 2021.

The general objective is to strengthen the role of civil society in contributing to democratization, good governance and influencing policy making, to foster the development of active civil society organizations (CSOs) in the promotion of political participation, advocacy, electoral observation and parliamentary monitoring through focusing on women and youth.

The project works on: 1) enhancing CSOs’ capacities to conduct civic education, voter’s information, public awareness on the roles of the Parliament and the Independent Commission for Election (ICE) and promoting the role of women and youth in the political life; 2) strengthening CSOs’ capacities to conduct domestic election observation; 3) reinforcing CSOs’ capacities to conduct parliamentary monitoring; and 4) firming up CSOs’ capacities to build coalitions, to conduct joint advocacy, to lobby, to establish pressure group, to contribute to policymaking and to monitor the human and civil rights situation.

At the beginning of the project, a comprehensive mapping of targeted CSOs was conducted, followed by a thorough qualitative research study to evaluate their status quo and existing capacities. The primary data collected was utilized to prioritize the areas of weaknesses detected and accordingly develop the first training module of its kind in Arabic and in Jordan.

Funded by the European Union
بتمويل من الاتحاد الأوروبي

مركز الدراسات
الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Prior to COVID-19, five training courses were conducted, and an additional eight training courses were held during the pandemic. A total of 176 CSOs were involved from the North, South and Central regions of Jordan.

Furthermore, an e-learning platform designed to allow involvement of young activists and CSOs particularly in remote areas to have access to the training material was launched in June (<https://cssqararuna.ju.edu.jo/home>). This platform allows for dissemination of knowledge and information needed to unlimited participants. As part of the program's sustainable model, the platform acts as a medium for dialogue among CSOs and civil society and will continue to operate even after the project comes to an end through the comments/questions tool which allows for interaction among registered individuals as well as the trainers.

In February 2020, the CSS organized a roundtable discussion in partnership with Hayat Center for Civil Society Development entitled "Parliament Monitoring: Mechanisms and means of development", this event intended to be a first move into creating a platform for dialogue between CSOs and members of Parliaments (MPs). The discussion which took place between the MPs and program trainees made them feel that they are an important and efficient part of the society. Moreover, this session is the first step towards building trust between both bodies, hence, organizing more of these round table discussions will be vital to establish a solid foundation between CSOs and the new 2020 MPs. This will certainly facilitate monitoring the MPs performance in the parliament.

Since one of Qararuna's main outputs is to enhance coalition building among civil society, the CSS made sure to build this coalition between all Qararuna partners as well. Accordingly, CSS organized a workshop to present the Spanish experience of parliament monitoring to two of Qararuna's partners (RASED and We Participate), and CSS' polling staff, at the same time, the Jordanian experience was introduced and both parties exchanged lessons learned, and different methods of monitoring the parliament, where the RASED, We Participate and CSS might utilize in the future.

بتنويل من الاتحاد الأوروبي

مركز الدراسات
الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Through April-September, 2021, three ‘Comprehensive Coalition Building Training of Trainers’ were organized in order to build the capacity of 30 CSO leads from across the kingdom on organizational development methods, advanced coalition building tools, internal governance, advocacy and media/social media utilization. Each trainee was then able to hold 2 training workshops (a total of 60 workshops) in their respective areas to disseminate the knowledge/ resources learned; one workshop for their respective CSO staff, and one workshop for a neighbouring CSO with similar scope(s) of work. Furthermore, the trainees organized 2 campaigns to call for public life participation and contribution to public policy making and lobbying for change; *‘Ta’zeez: Enhancing the participation of women and youth in political life’* in the north, ‘and *‘Qararuna: Voice of the youth’* in the middle.

One of the success stories resulting from the project was allocating thirteen internship opportunities to CSS-Qararuna trainees in International NGOs in Jordan, to apply what they have learned on practical ground. Another success story was that three of the trainees ran for the 2020 parliamentary elections; of which two were females from rural areas.

Since the beginning of the project CSS was keen to focus on building trust between the CSOs taking part in the trainings and acknowledge their role as true representatives of citizens (rather than political parties) and empower them as change-makers. This coalition is manifested by every-day interaction among participants on WhatsApp groups, even after the end of the training period for each group. Thus far, the project has been successful in creating a solid network for debate among CSOs; for which CSS acts as a central hub.

The impact of the training can be demonstrated by the participants’ observed change of attitude towards their: 1) electoral rights and obligations, 2) sense of belonging, 3) social cohesion and 4) belief that their role is vital in the democratization process which will lead to a peaceful democratic transition in Jordan. For instance, many participants reported to have changed their electoral behaviour(s)/view(s) based on the outputs of the training on Electoral law and the field visits to the Independent Election Commission (IEC).

الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Research Methodology

As the leading think-tank in the region and one of the only centers with a dedicated polling unit, conducting regular polling, the Center for Strategic Studies (CSS) at the University of Jordan understands the importance of gauging the sentiments of citizens. Polling remains the establishment method to understand behavioral attitudes, and in doing so, CSS adopts an eclectic range of questions, including Likert style questions, open-ended/close-ended, and questions related to demographic, through a proficient team of researchers.

Two sets of surveys are designed for the purpose of this project:

- 1) *A national cross-sectional survey adopting a multistage stratified cluster sampling design.*
- 2) *A non-random sampling of Civil Society Organizations (CSOs)*

In the national cross-sectional survey adopting a multistage stratified cluster sampling design, a nation-wide representative sample consisting of (at least) 2,400 respondents is drawn. Gender balance and inclusion of the marginalized, minorities, persons with no access to internet, the elderly, refugees and internally displaced persons are taken into consideration since they are key to achieving the main objective of the research activity. The only exclusion criteria for participation in the national sample survey interviews is age (*all participants must be above 18 years old*).

Theoretically, the purpose of sampling is to get a representative sample of the target population in a random manner. This sample is designed in a probability proportional to size (PPS) way to provide valid and reliable survey estimates across the entire Kingdom of Jordan - rural and urban areas, the twelve governorates, and smaller communities within. The sample is designed to ensure reliable estimates in terms of geographical distribution (North, Center, and South) and governmental level. Jordan is divided into three regions, the North covers Ajloun, Irbid, Jerash, and Mafraq, the Center covers Amman, Balqa, Madaba, and Zarqa, and the South covers Aqaba, Karak, Ma'an, and Tafieleh.

Funded by the European Union
بتنويل من الاتحاد الأوروبي

مركز الدراسات
الاستراتيجية
CENTER FOR STRATEGIC STUDIES

Using the 2015 Jordan Population and Housing Census as a sampling frame and the following updates on the households' frame which CSS has, households will be drawn using a "stratified cluster" form of sampling with a margin error of (5%) and a confidence level of 95%. The Kingdom is subdivided into area units called census blocks, which is then regrouped to form clusters – the Primary Sampling Units (PSU-Blocks) for this survey. Stratification will be achieved on three levels:

- 1- The classification of governorates into rural and urban areas
- 2- Administrative divisions within each urban and rural area
- 3- Clusters which will be identified and selected using PPS within each administrative division. The distribution of the sample among these stratum will be proportional to the relative population size of each stratum (probability-proportional to the cluster size)

Collective homes such as student housing, prisons, nursing homes, factory accommodations will be excluded, as they did not fit the definition of a Jordanian Household. A household is defined as a group of people living in the same dwelling space who eat meals together, acknowledging the authority of a man or a woman as the head of the household.

Following the determination of the targeted community in each cluster (blocks), a sample of 8 households is randomly drawn from each cluster with an equal probability systematic selection. After the household selection and obtaining the permission of household residents to participate in the survey, all the eligible household members are entered into the CSPRO program, which runs a random selection of the household member to participate in the survey, this is based on Kish gird or next birthday method, or Random pseudo selection.

As for the non-random sampling of Civil Society Organizations (CSOs), a targeted sample consisting of (at least) 240 respondents is drawn to be interviewed via telephone. The only inclusion criteria for participation is to be working at a CSO that has been previously selected for training of 1-2 of their members by Qararuna-CSS project. From each CSO contacted, one member that has been trained, and two members that have not been trained are selected for interview. The only exclusion criteria for participation in the CSO survey interviews is age (*all participants must be above 18 years old*).

A. Study Tools:

The formulation of study tools (national sample face-to-face interview questions and CSOs' telephone interview guide) is led by CSS, in collaboration with the funder.

B. Pilot Test:

Prior to field work conduction of **surveying**, a pilot trial is conducted to test the validity and reliability of questions addressed and data collected. The results of this pilot are to see how viable the survey questions are for the primary data collection. This pilot trial is conducted throughout all 3 regions of Jordan (the south, north and center), to enhance the efficiency of the survey.

C. Field Work Implementation of surveying:

Several levels of checks are taken to ensure data quality. In the field, supervisors are sent alongside the interviewers. They ensure that the interviewers are following the sampling plan and filling out the questionnaires correctly, this includes supervisors attending random interviews alongside the interviewers on a daily basis. CSS tends to call back at least 70% of the respondents for quality assurance purposes.

A total of 2484 face-to-face interviews and 273 telephone interviews are completed at the end of the data collection.

D. Data entry:

The data is collected using the latest CSPRO software and on tablets (CAPI) by face-to-face and telephone interviews with the selected participants.

Data entry is conducted in the field. Data collectors utilize Android tablets to record the answers of the questionnaire. CSpro software is used on the Android tablets to record all data. A Storage Device Memory Card (SD) is integrated in the Android tablets to ensure that a backup copy of data is stored, should any Android tablets failure occur. No additional data entry is required, since all data are entered live on the Android tablets.

CSS registers the GPS coordinates for most of the collected data as one of the quality control measures, in addition to the start and end times of each survey and

date of interview. Data from Android tablets are transferred and aggregated to CSS recommended server. Data sets are downloaded into a single master database following completion of the fieldwork.

E. Data Quality Check:

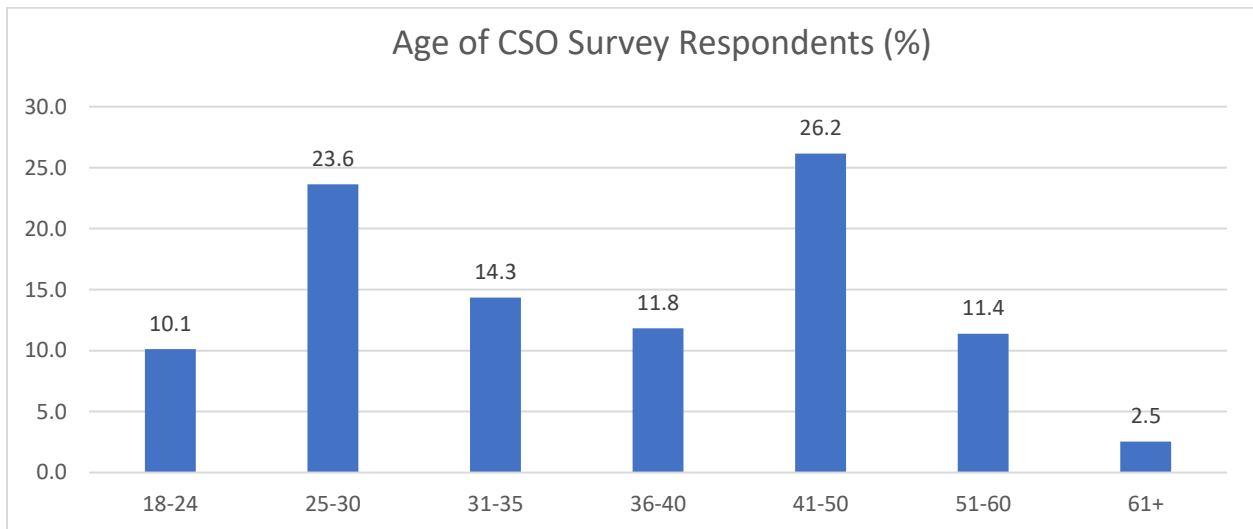

CSS adopts a systematic data quality check to guarantee the consistency and accuracy of data following the completion of field work. Therefore, prior to data analysis, CSS quantitative research experts review the data obtained by surveys.

F. Data Analysis and Reporting:

CSS researchers analyze the data using SPSS (version 25) software and use Microsoft Excel and Word to compose the descriptive quantitative report. Based on the final quantitative report, and data collected from secondary sources (literature review), a position paper is produced.

Demographics of Civil Society Organization Sample

A total number of 237 respondents were interviewed. The CSO staff respondents were 56.5% female and 43.5% male. The majority (48.0%) of respondents were young (18-35 years old), 38.0% middle aged (36-50 years), and 13.9% elderly (51+years old).

58.2% of the interviewees were founders of their organizations. The majority (30.0%) of interviewees were the CSOs' presidents, and 13.9% were executive board members.

Some other staff who hold the positions of media coordinator, human resources, operator, researcher, consultant, trainer, media editor, communication manager, advocacy officer, supervisor and lecturer were also interviewed.

More than half (53.6%) of the CSO staff respondents were holders of BA degrees, and 17.7% higher certificate (MA and PhD). A considerable 15.2% had attained diplomas, and 12.2% completed up to secondary education.

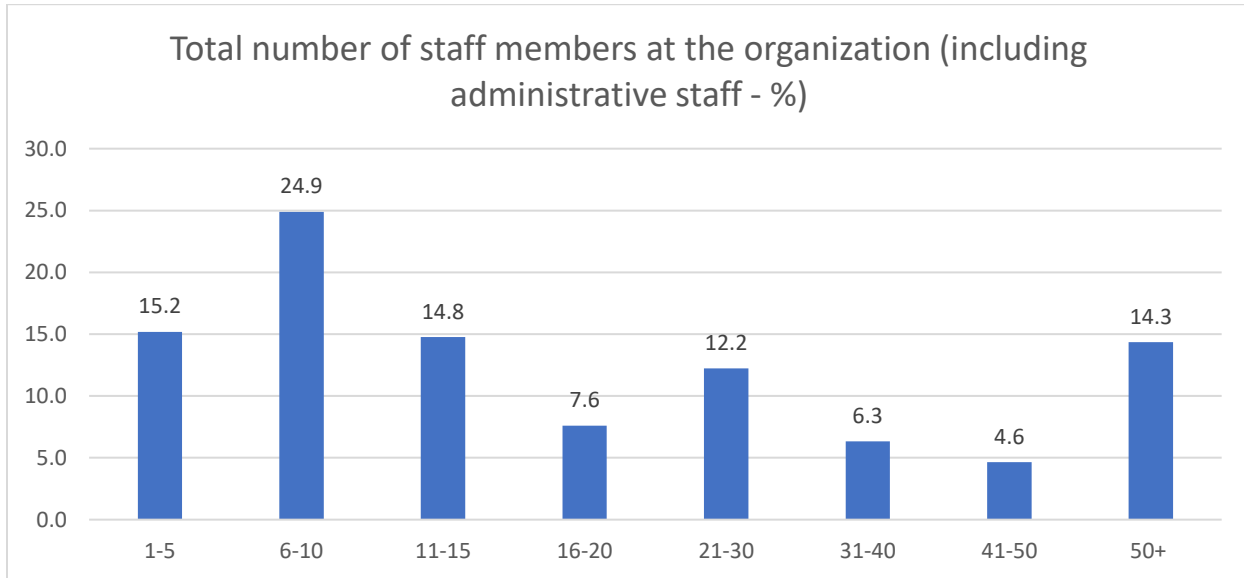

40.9% of respondents were from the central governorates (Amman, Balqaa, Zarqaa and Madaba), 42.2% from the northern governorates (Irbid, Jerash, Ajloun and Ma'raq), and 16.9% from the southern governorates (Karak, Tafilah, Ma'an and Aqaba).

		Governorate			
		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Amman	30	12.7	12.7	12.7
	Al Balqaa	15	6.3	6.3	19.0
	Zarqaa	17	7.2	7.2	26.2
	Madaba	35	14.8	14.8	40.9
	Irbid	40	16.9	16.9	57.8
	Jerash	20	8.4	8.4	66.2
	Ajloun	10	4.2	4.2	70.5
	Al Ma'raq	30	12.7	12.7	83.1
	Al Karak	26	11.0	11.0	94.1
	Al Tafilah	7	3.0	3.0	97.0
	Ma'an	3	1.3	1.3	98.3
	Aqaba	4	1.7	1.7	100.0
	Total	237	100.0	100.0	

General Information about CSOs Interviewed

62.5% of CSOs have somewhere between 1-20 staff members at their organization. 23.1% have 21-50 staff members, and a considerable 14.3% have more than 50 staff members.

Almost half (49.4%) of CSO staff respondents interviewed worked at CSOs established within the past five years. A considerable 41.4% worked at CSOs established within the past 6-20 years, and 9.3% worked at CSOs older than 20 years. The oldest organization dated back to the year 1957.

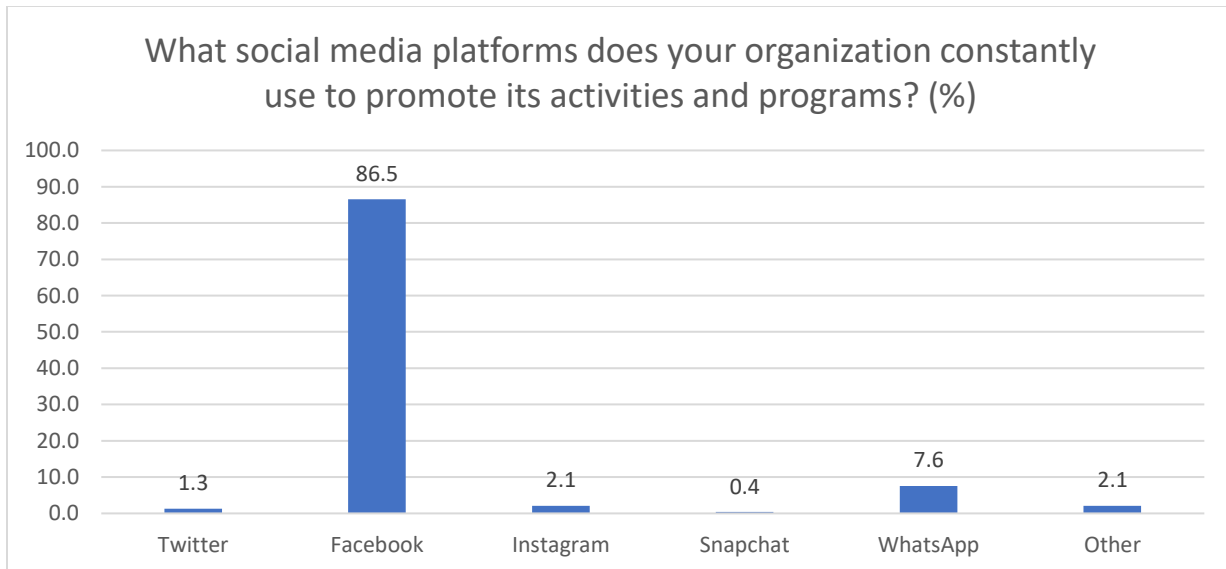

Most (79.3%) of these CSOs had no branches, and 16.9% had only one branch. The remaining 3.8% had 2-8 branches.

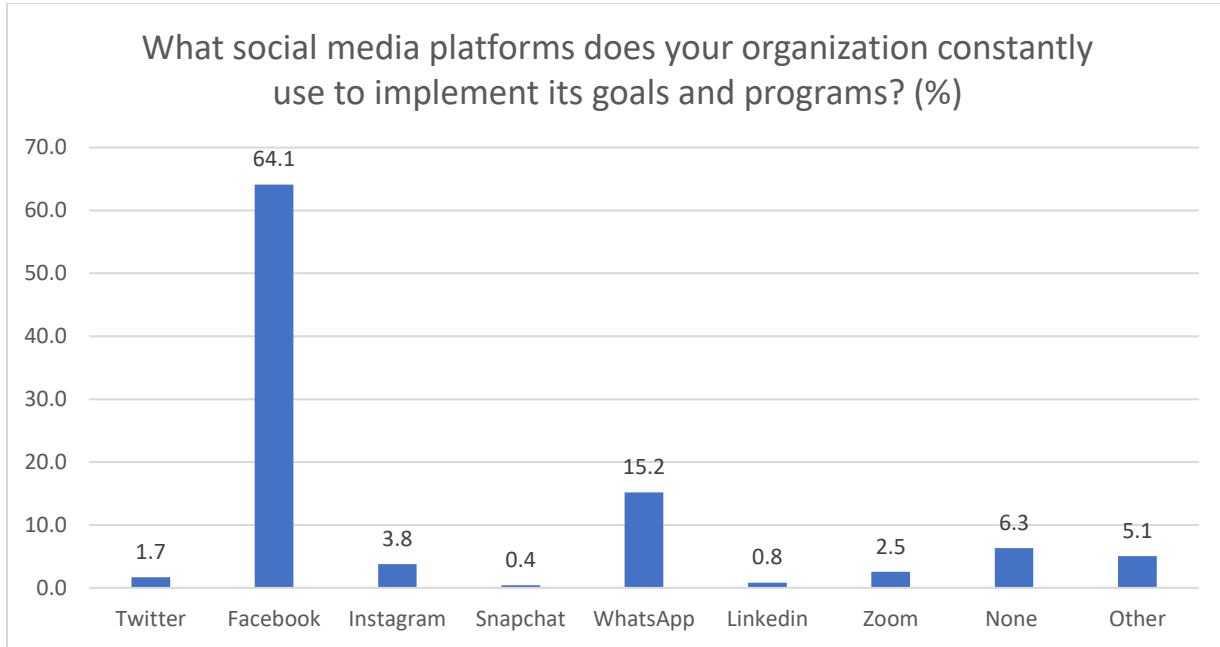

The majority (45.1%) of these CSOs are registered/licensed at the Ministry of Social Development, 13.9% at the Ministry of Political and Parliamentary Affairs, 13.9% at the Ministry of Culture and 11.4% at the Ministry of Trade and Supply.

The overwhelming majority (86.5%) of CSOs use Facebook as the main platform to promote their activities and programs, and a lesser 7.6% utilize WhatsApp.

In addition, almost two thirds (64.1%) of CSOs use Facebook to implement their goals and programs, and a lesser 15.2% utilize WhatsApp for the same reason.

Demographics of National Sample

A total number of 2484 were interviewed; of whom 2421 completed the survey. The sample was divided almost equally with regard to gender (49.9% female, 50.1% male). 42.8% of respondents were young (18-35 years old), 31.9% middle aged (36-50 years), and 25.3% elderly (51+years old).

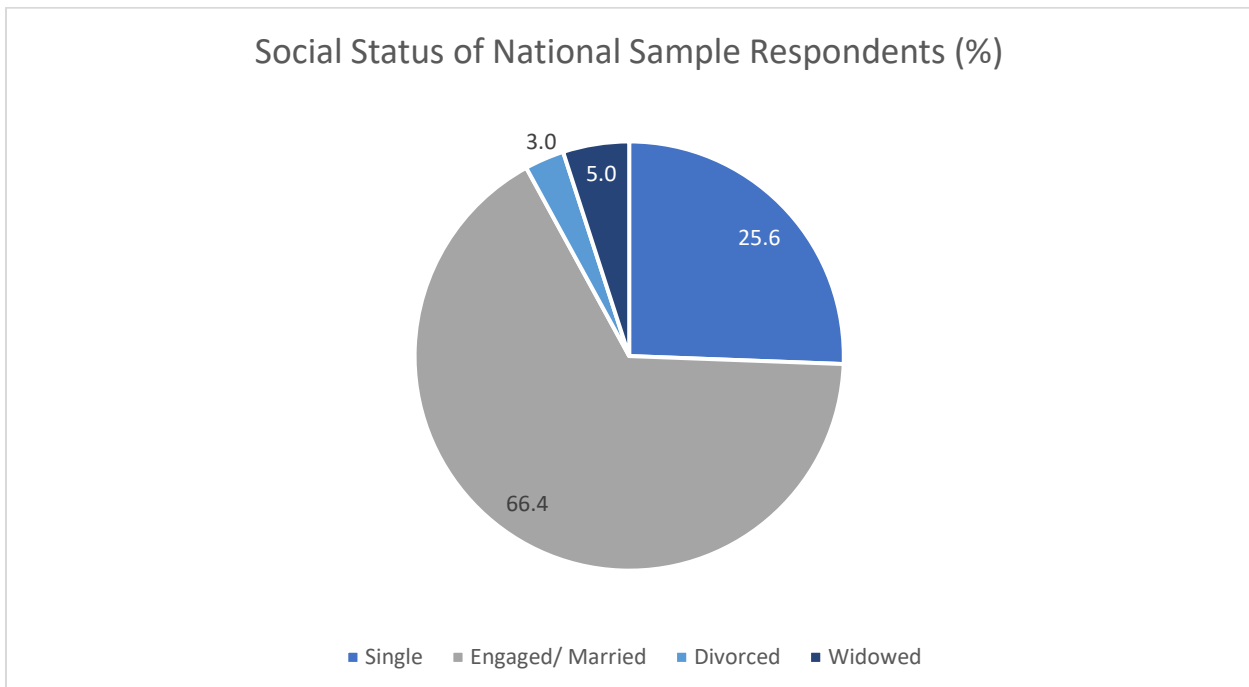

Almost one third (34.2%) of the national sample respondents attained diploma or university education.

65.1% of the national sample respondents were from the central governorates (Amman, Balqaa, Zarqaa and Madaba), 27.5% from the northern governorates (Irbid, Jerash, Ajloun and Mafraq), and 7.4% from the southern governorates (Karak, Tafilah, Ma'an and Aqaba). Respondents were 90.9% from urban areas, and 9.1% from rural areas.

The majority (66.4%) of the national sample respondents are engaged/married, 25.6% single, 5.0% widowed and 3.0% divorced.

One quarter (25.1%) of the national sample respondents have a part- or a full-time job; of which the majority (59.6%) worked in the public sector, 39.1% in the private sector, 0.7% in NGOs and 0.6% in other sectors. Almost one third (30.5%) are housewives, 14.0% are either students or unemployed, and 7.1% are unemployed but looking for a job.

A considerable 40.1% of the national sample respondents reported to have no income at the time of the interview. 13.5% receive less than 200 JDs monthly salary, 42.8% receive 201-700 JDs, and 3.2% receive more than 700 JDs monthly salary.

4.1% of the national sample respondents reported that their households have no source of income whatsoever, 27.9% reported a monthly total income of less than 300 JDs, 63.6% have a total income of 301-1000 JDs, and 3.6% have a total household income above 1000 JDs every month.

1 The Status Quo of CSOs in Jordan

In Jordan, CSOs can be registered at a number of institutes. From the 237 CSO staff respondents interviewed, the majority (45.1%) stated that their CSOs were registered at the Ministry of Social Development. Conversely, the majority of respondents (35.0%) think that CSOs should be overseen by the same ministry.

The ministries of Political and Parliamentary Affairs (18.6%) and Culture (16.9%) were also thought of as eligible establishments to supervise CSOs. To a lesser extent, the ministries of Youth (11.8%) and Interior (10.5%) were also considered fit to administer CSOs under their institutional umbrellas.

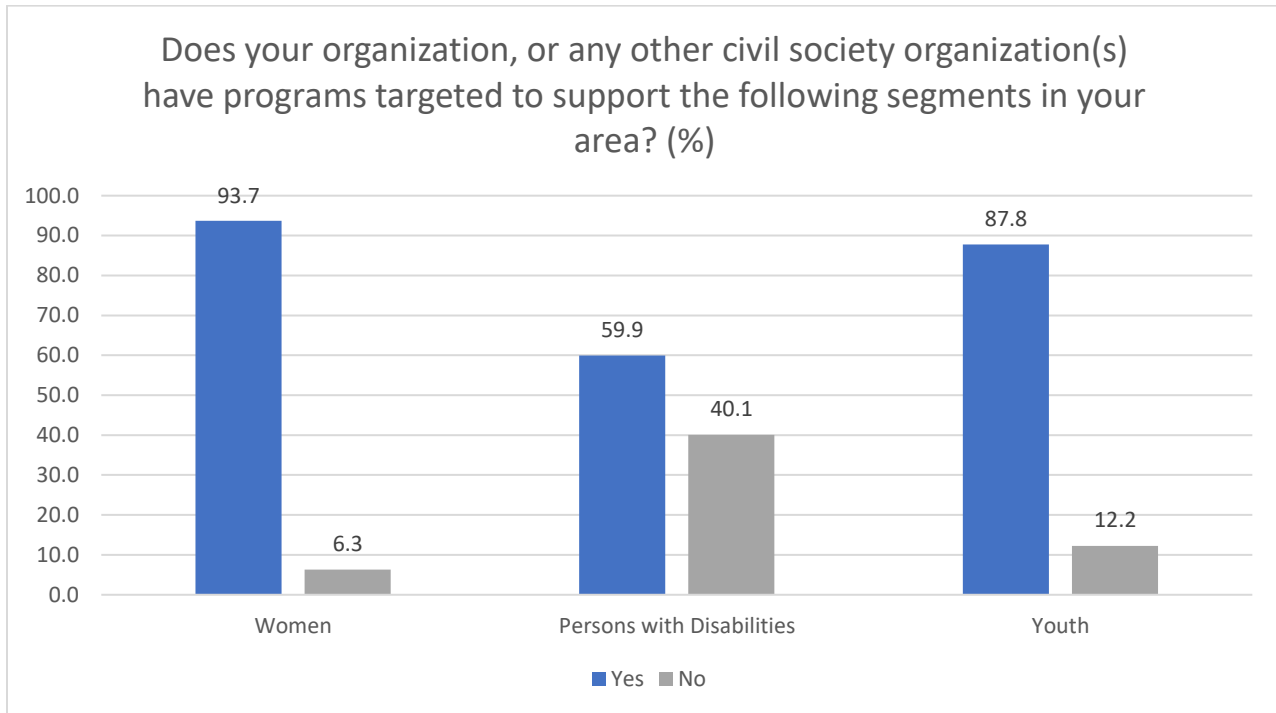

The percent differences, however, between current registration bodies of CSOs and desired institutions to supervise CSOs did not exceed the 10.1%. A higher percentage of CSO staff respondents wanted the ministries of Youth (9.7%), Interior (8.4%) and Political and Parliamentary Affairs (4.6%) to take charge of CSOs, whereas less respondents wanted to be registered at the ministries of social development (-10.1%) and Trade and Supply (-5.1%).

	Which entity is your organization registered/licensed at?	In your opinion, who should be supervising civil society institutions?	Count Difference	% Difference
Ministry of Social Development	107	83	24	10.1
Ministry of Political & Parliamentary Affairs	33	44	-11	-4.6
Ministry of Culture	39	40	-1	-0.4
Ministry of Industry Trade & Supply	27	15	12	5.1
Ministry of Interior	5	25	-20	-8.4
Ministry of Youth	5	28	-23	-9.7
Ministry of Environment	3	0	3	1.3
Ministry of Tourism	2	0	2	0.8
Ministry of Local Administration	0	2	-2	-0.8

The majority of CSO staff respondents reported to have programs targeted at women (93.7%), youth (87.7%), and to a lesser extent persons with disabilities (59.9%).

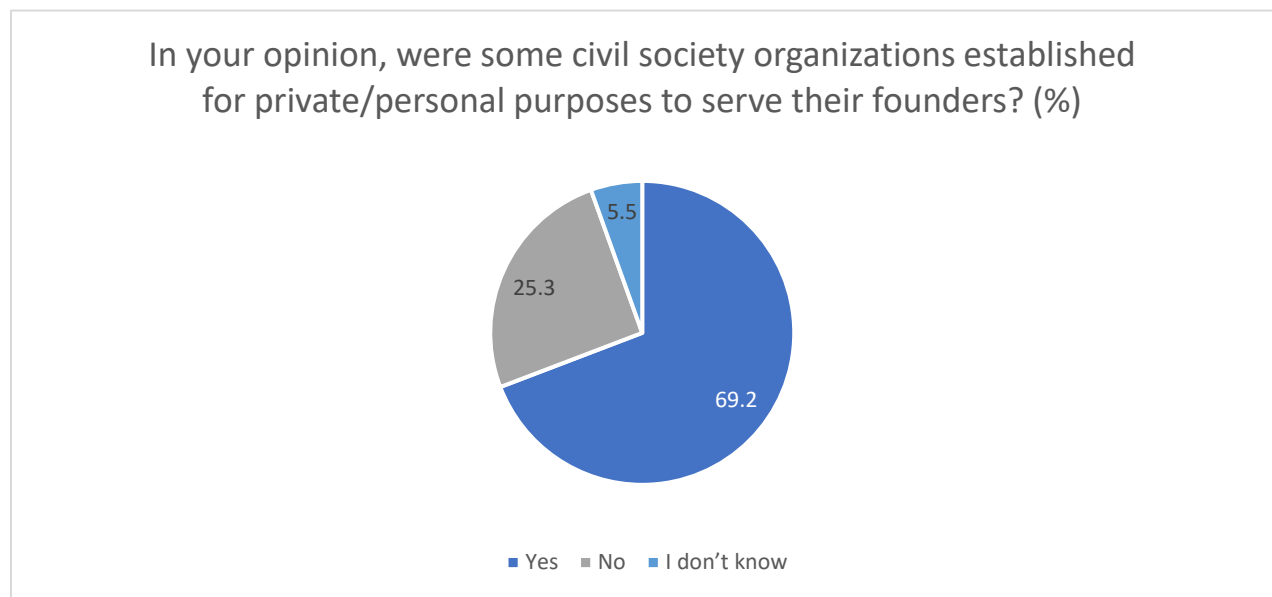

Does your organization, or any other civil society organization(s) have programs targeted to support the following segments in your area?

		Women	Persons with Disabilities	Youth
Valid	Yes	93.7	59.9	87.8
	No	6.3	40.1	12.2

In general, no differences were reported regarding the number of programs targeted at women, youth and persons with disabilities within CSOs that have taken part in the Qararuna – CSS training, and those who have not.

In the opinion of the majority (69.2%) of CSO staff respondents, some CSOs were indeed established to serve their founders' private/personal interests. Whereas one quarter (25.3%) of respondents reported the opposite. 5.5% did not know.

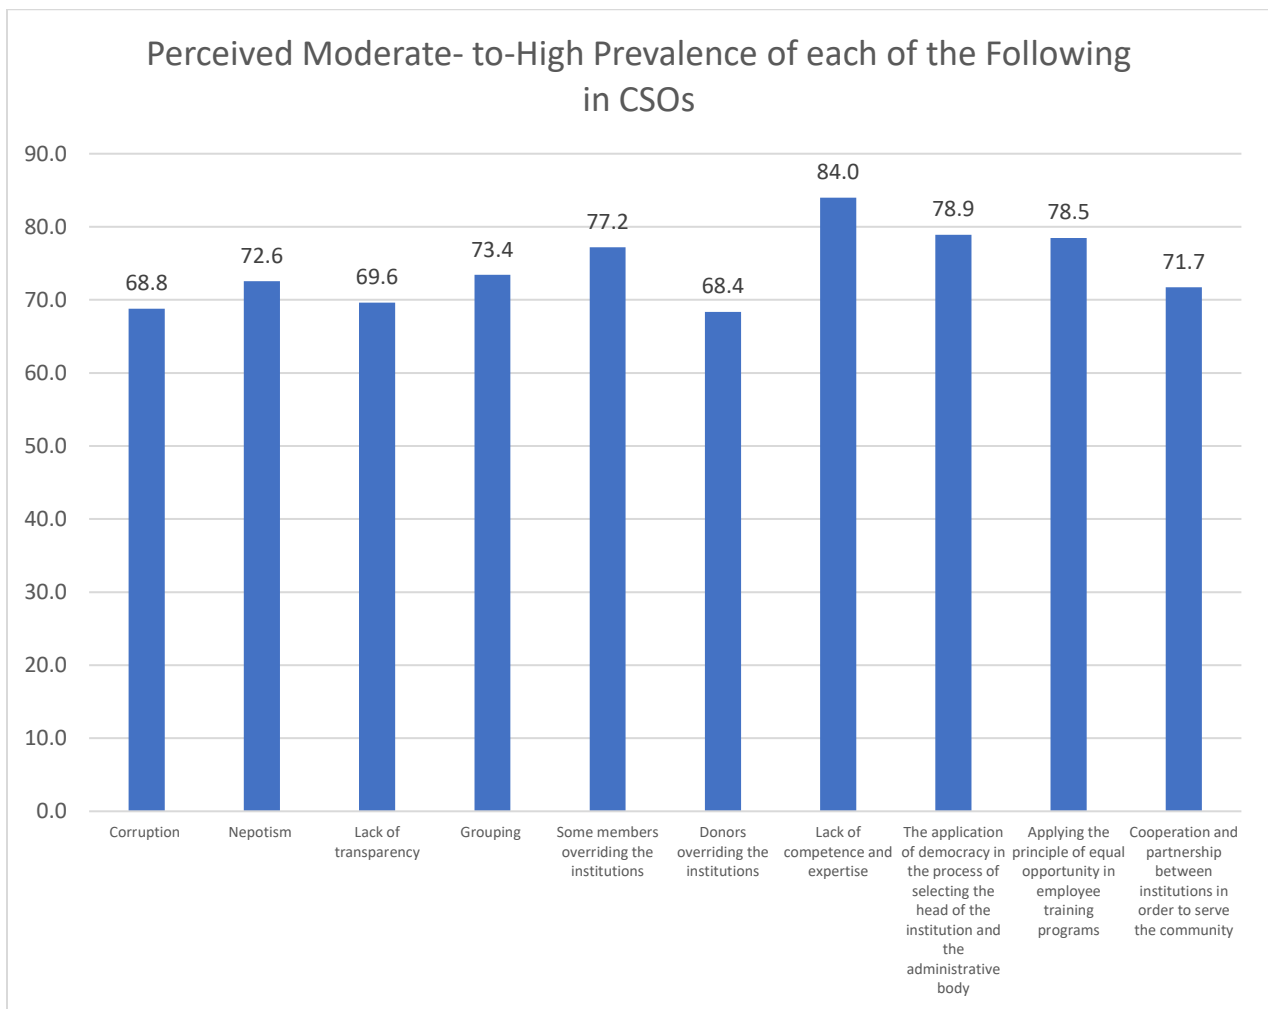

In your opinion, were some civil society organizations established for private/personal purposes to serve their founders?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Yes	164	69.2	69.2	69.2
	No	60	25.3	25.3	94.5
	I don't know	13	5.5	5.5	100.0
	Total	237	100.0	100.0	

According to the CSO staff respondents, the most prevalent issues that face CSOs are the lack of competent staff (84.0%), followed by the some members overriding the institution (77.2%), grouping (73.4%), and nepotism (72.6%). Unpredictably, the prevalence of corruption reported among CSOs is almost equal to the percent of donors reported to be overriding those institutions (68.8% and 68.4% respectively).

Some constructive aspects were also found to be almost equally prevalent across CSOs; such as the democratic selection of administrative members (78.9%), equal employment opportunity (78.5%) and cooperation and partnership between CSOs (71.7%). This indicates that the prevalent nepotism and corruption are being implemented for other gains.

2 Knowledge, Perception and Engagement with CSOs

A total of 97.5% of national sample respondents knew what Civil Society Organizations (CSOs) were. Of those, 32.6% needed to hear the definition of CSOs to be able to recognize them.

Civil society organizations were defined to be a wide range of non-governmental organizations, associations, and non-profit organizations that have a presence in public life and are interested in expressing the interests and values of their members or the surrounding civil society, based on ethical, cultural, political, scientific, religious or charitable considerations.

Almost two thirds (65.3%) of national sample respondents reported to have at least one CSO in their areas. The remaining 28.2% do not. Beneficially, a slightly higher percentage (70.9%) of rural areas residents reported to have at least one nearby CSO, compared to 64.8% or urban areas residents.

Is there any civil society organization in your area? * Urban/Rural Crosstabulation

	Urban	Rural	Total
Yes	64.8	70.9	65.3
No	28.3	27.4	28.2
Don't Know	7.0	1.8	6.5

However, almost one third (30.2%) only know how to join one of these organizations. Relatively, rural residents are slightly better well-rounded about how to join one of these organizations (36.5%), compared to urban residents (29.6%).

do you know how to join one of these organizations? * Urban/Rural Crosstabulation

	Urban	Rural	Total
Yes	29.6	36.5	30.2
No	67.1	62.6	66.7
I don't Know	3.3	0.9	3.1

Almost one quarter (23.0%) of national survey respondents are members of CSOs, while 77.0% are not. Part-time employees (36.0%) and retired (31.6%) respondents ranked the highest percent of CSO memberships, compared to respondents with other employment statuses.

What is your employment status

		Student/Unemployed	Full time employed	Part time employed	Has own business	Retired	Housewife	Unemployed and looking for a job	Total
Are you a member of a civil society organization?	Yes	21.0	24.1	36.0	28.8	31.6	17.7	12.7	23.0
	No	79.0	75.9	64.0	71.2	68.4	82.3	87.3	77.0
Total		100	100	100	100	100	100	100	100

Most of the participants had either communicated, worked, or participated in an activity conducted by a CSO in their area (70.6%), or outside their area (88.2%). This means that a considerable percentage (17.6%) of national survey respondents engaged more with CSOs outside their areas in some form of activity.

Within their areas, respondents reported to have mostly taken part in workshops, training and awareness sessions (29.7%), participated in charitable and voluntary work and received personal aid (23.8%) and engaged in religious and Quran memorization programs (12.9%).

Outside of their areas, respondents reported to have taken part in a higher percentage of workshops, training and awareness sessions (39.0%; 9.3% more than local areas), and charitable and voluntary work (46.3%; 22.5% more than local areas).

Have you ever communicated, worked with or participated in an activity conducted by civil society organizations in your area?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Yes	464	29.3	29.3	29.3
	No	1118	70.6	70.7	100.0
	Total	1582	100.0	100.0	

Have you ever communicated, worked with or participated in an activity conducted by civil society organizations outside of your area?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Yes	287	11.8	11.8	11.8
	No	2135	88.2	88.2	100.0
	Total	2421	100.0	100.0	

Half (49.9%) of the national sample respondents think that having CSOs in Jordan is highly important. And a total of 83% think that having CSOs in Jordan is moderately-highly important. Only 5.7% see no importance for CSOs whatsoever.

Percent respondents living in rural and urban areas are almost comparable in terms of their opinion regarding the importance of having CSOs in Jordan, however, respondents from urban areas slightly have a lower faith in CSOs (6.0% not important at all; versus 4.5% in rural areas).

Divorced respondents also showcase a slightly higher importance of CSOs in Jordan (98.5% somewhat-highly important), relative to single (91.1%), engaged/married (93.1%), and widowed (92.6%) respondents.

Respondents who have their own business or are retired are the least who see the importance of CSOs in Jordan (10.1% and 10.2% respectively reporting no importance at all).

Surprisingly, respondents with higher personal and household income levels perceive having CSOs as more important in Jordan, compared to lower income groups' respondents. All respondents who have personal income rate above 1500 JDs/month think having CSOs in moderately-highly important; and all respondents who have income rate above 2500 JDs/month think it is highly important. Similarly, all respondents whose household income rate is above 2500 JDs/month think having CSOs in Jordan is highly important. This can be explained by the higher socioeconomic background of respondents; reflecting a higher level of education and culture; thus better appreciation and understanding of the role of CSOs in a society; particularly a developing one. However, a higher sample size will be required to determine this assumption.

What is the degree of importance of having civil society organizations in Jordan?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Highly important	1241	49.9	51.2	51.2
	Moderately important	823	33.1	34.0	85.2
	Somewhat important	181	7.3	7.5	92.7
	Not important at all	141	5.7	5.8	98.5
	I don't Know	36	1.4	1.5	100.0
	Total	2421	97.5	100.0	
Missing	System	63	2.5		
Total		2484	100.0		

Almost two thirds (64.3%) of national sample respondents think that CSOs are carrying out their tasks adequately, (65.0%) trust CSOs in general, (66.5%) trust CSOs in their areas, and (66.5%) think CSOs work for the public good. At the same time, a considerable 29.9%-31.0% voiced their doubts in the proficiency and good intention of CSOs (respectively), which was reflected in their lack of trust in CSOs (30.5%).

Females reported a slightly higher degree of trust in CSOs in general (69.8% moderate to high extent), compared to males (63.4% moderate to high extent) - reporting a difference of 6.4%.

Regarding CSOs serving the public good, females significantly reported higher trust in CSOs (72.3%), versus males (60.8%) - reporting a difference of 11.5%.

The reasons for not trusting CSOs in general mainly stemmed from the perception that CSOs are exploited to serve personal interests (42.3%), the lack of transparency, credibility, and justice (33.2%), financial and administrative corruption (7.9%), and racism/prejudice (4.7%).

The same reasons attribute to the reduced/lack of trust in CSOs in respondents' local areas; particularly the lack of transparency, credibility, and justice (28.4%), nepotism (24.5%), exploitation of CSOs for own interests (15.8%), unequal distribution of aid (10.8%), financial and administrative corruption (6.3%), prevalence of racism/prejudice (5.9%), and lack of competent staff (3.9%).

When asked about the contribution of CSOs to achieving human development, spreading awareness through social media and defending public rights and freedoms in Jordan, the national sample respondents reported that CSOs contribute least to defending public rights and freedoms (27.6% do not contribute at all), compared to 16.9% who think CSOs do not contribute to achieving human development and 17.9% to spreading awareness online.

On the other hand, 57.8% think that CSOs contribute to achieving human development, empowering local community members and enhancing their life skills, 57.3% to spreading awareness through social media platforms and 45.8% to defending public rights and freedoms– all to moderate-high extent.

To what extent do you think that CSOs...?

	Contribute to achieving human development, empowering local community members and enhancing their life skills	Contribute to spreading awareness through social media platforms	Defend public rights and freedoms

Examples on programs targeted to support women, according to the national sample respondents include handicraft courses (cosmetic, sewing, home-made products, IT) (33.3%), economic empowerment of women (18.1%), providing financial assistance (aid and in-kind donations) (16.9%), awareness and cultural sessions (motherhood, family, violence) (9.8%) and providing job opportunities for women (2.6%).

However, financial assistance, training and recreational activities topped the list of programs targeted to support persons with disabilities (50.4%), followed by providing medical treatment and equipment (26.2%) and teaching support (8.1%).

Youth-targeted projects mentioned by national sample respondents included vocational and handicraft training workshops (34.4%), social and political awareness sessions (13.1%), sports activities (12.2%), financial support (12.3%), providing job opportunities (10.1%), opening the door for charity and volunteer work (4.7%) and Quran memorization courses (4.0%).

3 Role of CSOs in Influencing Political Participation and Promotion of Democracy

a) Civil Society Organizations

A total number of 237 Civil Society Organizations (CSOs) staff members were interviewed from 128 CSOs across the Kingdom of Jordan. When asked about the extent of general influence of CSOs on the political participation course and promotion of democracy in Jordan, a majority of 86.5% reported moderate to high influence; of which almost 50% (half of the sample) reported high extent of influence. 8.4% think CSOs have a low influence on these pressing issues, whereas 5.1% do not believe CSOs have any role in changing the path of political sphere.

To what extent do you think civil society organizations in Jordan have a role in influencing political participation and promotion of democracy?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	To a high extent	117	49.4	49.4	49.4
	To a moderate extent	88	37.1	37.1	86.5
	To a low extent	20	8.4	8.4	94.9
	They have no role at all	12	5.1	5.1	100.0
Total		237	100.0	100.0	

A considerable percentage of CSO staff respondents (37.9%) see that their organizations are 80-100% influential (have high influence) when it comes to political participation and promotion of democracy in their communities. The majority (89.4%), however, think that their organizations have 40+% influence (have moderate to high influence) in the same scope. Only 7.6% think their organizations have 10-30% influence (low influence), whereas 3.0% think their organizations have no influence at all in the political participation and democratization processes where they are based.

How influential is your organization when it comes to political participation and promotion of democracy in your community?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	0	7	3.0	3.0	3.0
	10-30	18	7.6	7.6	10.5
	40-60	73	30.8	30.8	41.4
	65-75	49	20.7	20.7	62.0
	80-87	52	21.9	21.9	84.0
	90-100	38	16.0	16.0	100.0
	Total	237	100.0	100.0	

According to CSO staff respondents, the two most common activities that CSOs conduct to influence political participation and democratization in Jordan are: raising awareness (81.4%) and conducting trainings (38.4%). Only a few build coalitions with other CSOs (7.2%), monitor elections (3.0%) or hold advocacy campaigns (2.5%).

What are the activities that your organization conducts to influence political participation and promote democracy?

		Frequency	Percent
Valid	Roundtables	27	11.4
	Raising Awareness	193	81.4
	Training Workshops	91	38.4
	Projects	21	8.9
	Coalition-building with CSO	17	7.2
	Volunteering	1	0.4
	Youth Empowerment Projects	14	5.9
	Women Empowerment Projects	9	3.8
	Providing Aid	13	5.5
	Research Papers	5	2.1
	Providing Suggestions	5	2.1
	Advocacy Campaigns	6	2.5
	Initiatives	4	1.7
	Election Monitoring	7	3.0
	Other	4	1.7
	None	10	4.2
Don't Know	6	2.5	

The majority of CSO staff respondents (91.1%) think that CSOs have become integral to the social component to a moderate-to-large extent in Jordan. Only 6.8% consider the integration of CSOs to still be weak. A minority (2.1%) do not see any integration at all.

In your opinion, to what extent have civil society organizations become integral to the social component?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	To a high extent	125	52.7	52.7	52.7
	To a moderate extent	91	38.4	38.4	91.1
	To a low extent	16	6.8	6.8	97.9
	They are not part of the social component at all.	5	2.1	2.1	100.0
Total		237	100.0	100.0	

Almost two thirds of the CSO staff respondents (64.6%) believe that the incorporation of CSOs as an integral part of the civil society had progressed during the past five years, as opposed to a lesser (15.2%) percentage who think this role had declined. One fifth, however, see neither a decline nor an increase in CSOs' stance within society.

Over the past five years, do you think this role has progressed, declined, or remained unchanged? (%)

■ Progressed ■ Declined ■ Remained unchanged

Over the past five years, do you think this role has progressed, declined, or remained unchanged?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Progressed	153	64.6	64.6	64.6
	Declined	36	15.2	15.2	79.7
	Remained unchanged	48	20.3	20.3	100.0
	Total	237	100.0	100.0	

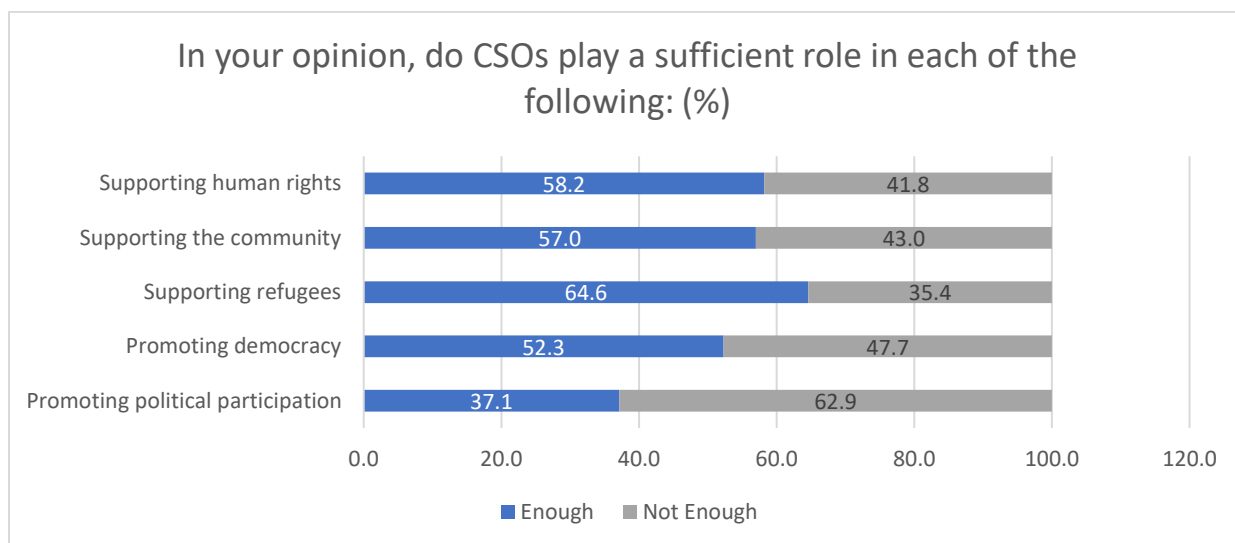

CSO staff respondents attributed this progress mainly due to the increased awareness of people (54.9%). Additional reasons for this perceived progress were reported to be the increase in prevalence of CSOs (10.5%), better service delivery (8.5%), active participation of CSOs (5.2%), and technological development (2.0%).

Astoundingly, even though the COVID-19 pandemic had largely contributed to the decline in the role of CSOs (-47.2%), the virus outbreak served into the progress of a few (1.3%).

In the opinion of CSO staff respondents, the aspects in which CSOs play a sufficient role **in** are mostly supporting refugees (64.6%), human rights (58.2%), the local community (57.0%) and promoting democracy (52.3%). To a lesser extent, respondents think that CSOs play a sufficient role in promoting political participation (37.1%). This means that CSOs play almost as half the role in supporting political participation as in supporting the refugees, mostly due to the decision-making bodies neglecting the role of CSOs in this regard (42.3%), running weak programs (28.2%), inadequate funding (14.8%) and misunderstanding of the supposed role of CSOs by members of the community (10.7%).

As for not being able to provide enough support for promoting democracy, CSO staff respondents think it is due to lack of inter-CSO liaison (15.0%), scarcity of funding (15.0%), weak communication with members of the society (14.2%), impeding laws and regulations (9.7%) and even lack of knowledge/expertise (7.1%).

In your opinion, do civil society organizations play a sufficient role in each of the following:

		Enough	Not Enough	Total
Promoting political participation	Count	88	149	237
	%	37.1	62.9	100.00%
Promoting democracy	Count	124	113	237
	%	52.3	47.7	100.00%
Supporting refugees	Count	153	84	237
	%	64.6	35.4	100.00%

Total		237	100.0		

A total of 77.3% of CSO staff respondents see that CSOs will have a moderate-high role in the upcoming municipal and decentralization elections in Jordan. A lesser 10.1% see a diminished role for CSOs. Whereas 12.7% do not predict any role at all.

To what extent do you think civil society organizations will have a role in the upcoming municipal and decentralization elections?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	To a high extent	103	43.5	43.5	43.5
	To a moderate extent	80	33.8	33.8	77.2
	To a low extent	24	10.1	10.1	87.3
	They will have no role at all	30	12.7	12.7	100.0
Total		237	100.0	100.0	

According to more than half (59.9%) of the CSO staff respondents, Jordanians have a moderate trust in CSOs. The remaining 40.1% however have either high trust in CSOs (18.1%), low trust (16.5%) or no trust at all (5.5%).

To what extent do you think Jordanian citizens trust civil society organizations?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	To a high extent	43	18.1	18.1	18.1
	To a moderate extent	142	59.9	59.9	78.1
	To a low extent	39	16.5	16.5	94.5
	They have no trust at all	13	5.5	5.5	100.0
	Total	237	100.0	100.0	

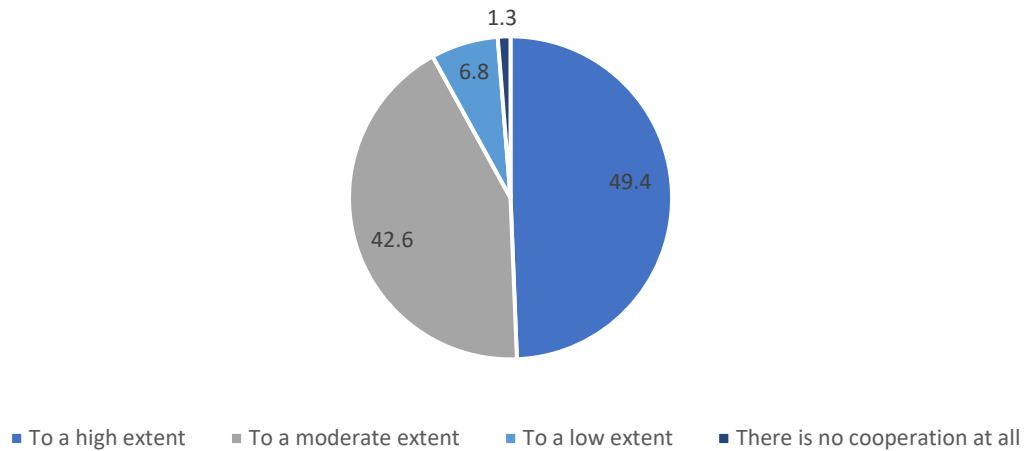

This low or no trust at all in CSOs is attributed to the lack of credibility of CSOs in the first place (10.1%), corruption of some organizations (4.6%), reputation of CSOs (4.2%) and inadequate funding (2.5%).

Almost half (49.4%) of the CSO staff respondents think that their local community members highly cooperate with them, and an additional 42.6% cooperate to a moderate extent with them (a total 92% show moderate-high level of cooperation). Only 6.8% think that people somewhat cooperate with CSOs and 1.3% think that they do not cooperate at all.

This means that almost one third (31.3%) of CSO staff respondents think that members of the local community highly cooperate with the CSOs but do not necessarily have high trust in them.

To what extent do you think members of the society cooperate with your organization? (%)

To what extent do you think members of the society cooperate with your organization?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	To a high extent	117	49.4	49.4	49.4
	To a moderate extent	101	42.6	42.6	92.0
	To a low extent	16	6.8	6.8	98.7
	There is no cooperation at all	3	1.3	1.3	100.0
	Total	237	100.0	100.0	

This moderate-high cooperation between CSOs and members of the local community comes in the forms of: (1) engaging in trainings, and organizing activities/ voluntary campaigns (99.1%), (2) strengthening the role of local communities through liaison with official institutions (29.8%), and (3) charity work (13.8%).

Almost half (51.9%) of the CSO staff respondents think that CSOs became lobbyists to a moderate extent in promoting political participation and democracy, 14.3% think CSOs are still weak lobbyists and 12.7% think CSOs are not lobbyists in this regard at all. Only 21.1% think that CSOs have become strong lobbyists in promoting for political participation and democratization, leaving room for a total of 78.9% improvement.

To what extent do you think civil society organizations have become lobbyists in promoting political participation and democracy?

4 Elections Participation and Parliament Monitoring

a) Civil Society Organizations

The majority (81.0%) of CSO staff respondents participated in the previous parliamentary elections (year 2020), whereas 19.0% did not. The main reasons for not participating were due to dissatisfaction with the electoral process and candidates and health issues (including infection with COVID-19).

Have you participated in the previous parliamentary elections (year 2020)? (%)

If your answer is no, why haven't you participated (CSOs)?

	Frequency	Percent	Valid Percent	Cumulative Percent
Dissatisfaction with the electoral process and candidates	15	33.3	33.3	33.3
Health issue (including infection with COVID-19)	15	33.3	33.3	66.7
Working as an election observer	4	8.9	8.9	75.6
Boycotting elections	5	11.1	11.1	86.7
Distant polling location	2	4.4	4.4	91.1
Being outside of the country then	1	2.2	2.2	93.3
Insufficient time	1	2.2	2.2	95.6
No reason	2	4.4	4.4	100.0

The majority (76.8%) of CSO staff respondents did not campaign for any candidate in the 2020 parliamentary elections. No significant differences were found between respondents who have received Qararuna-CSS training, and those who have not. Most important tools utilized for campaigning were social media platforms (60.0%), individual and collective meetings (41.8%), advertising and promotion (23.6%) and roundtables (21.8%).

Have you campaigned for any candidate?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Yes	55	23.2	23.2	23.2
	No	182	76.8	76.8	100.0
	Total	237	100.0	100.0	

If your answer is yes, what were the most important tools you utilized to campaign?

		Frequency	Percent
Valid	Social Media Platforms	33	60.0
	Roundtables	12	21.8
	Individual and collective meetings	23	41.8
	Community mobilization	5	9.1
	Distributing Brochures	9	16.4
	Advertising and Promotion	13	23.6
	Other	5	9.1

When CSO staff respondents were asked about the number of parliamentary blocs in the current House of Representatives only 5 (out of 237) answered correctly; given that the right answer is 7 parliamentary blocs.

And when asked about the number of parliamentary committees in the current House of Representatives, only 7 (out of 237) answered correctly; given that the right answer is 15 parliamentary committees excluding the temporary committee for responding to the speech of the throne.

Only 22.4% of the CSO staff respondents follow the current House of Representative's members' activities constantly/frequently, whereas 31.6% follow their electoral district's parliament representative's activities as frequently. The majority of respondents follow them sometimes (56.1%; and 40.9% respectively). A considerable percentage, however, do not (21.5%; and 27.4% respectively).

More than half (58.2%) of the CSO staff respondents reported that their organization played a role in influencing participation in the 2020 parliamentary elections.

Has your organization played a role in influencing participation in the previous parliamentary elections (2020)?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Yes	138	58.2	58.2	58.2
	No	99	41.8	41.8	100.0
	Total	237	100.0	100.0	

More than half (57.4%) of the CSO staff respondents said that they maintain communications between their organization and electoral district's parliament representatives. The different forms of this communication are mainly holding meetings and roundtables (30.1%), general communication whether direct or through social media (15.4%), providing financial and moral support (14.0%), collaboration (11.8%) and attending CSOs' activities/events (10.3%).

The main reason for not having such a communication was reported to be poor communication by members of the parliament (28.7%), whether it was lack of interest, lack of credibility or pre-occupation with other tasks.
